Reasons for Allowance

Applicants' response to the last Office Action, filed June 24, 2004, has been entered and made of record.

The rejection to claims 30-31, and 36-38 has been rendered moot by Applicant's cancellation of those claims.

The following is an examiner's statement of reasons for allowance:

Independent claims 15, 32 and 43 are allowable over the prior art of record. Claims 18-20, 33, 46-47 depend from claims 15, 32, and 43 respectively, therefore, are allowed.

Independent claims 15 and 43 recite the limitations of : selecting pixels based on a selector plane that identifies whether original image information is maintained in the upper plane or the additive plane. The combination of these features as cited in the claims in combination with the other limitations of the claims, are neither disclosed nor suggested by the prior art of record.

Independent claim 32 recites the limitations of :a selection device to select image data from at least one of the planes and the additive plane to reconstruct the image, wherein the selection device weights an amount the result derived from said upper plane based on a predetermined factor that is a value of a selector plane that identifies how much of the result is derived from each the upper and the additive planes . The combination of these features as cited in the claims in combination with the other limitations of the claims, are neither disclosed nor suggested by the prior art of record.

The closest references of US 5778092 to Macleod discloses a system for dividing an image to upper, lower, and selector planes for encoding, and reconstructing the decoded image to an additive plane. However, he does not teach the limitations of cited above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
